PRODUCT DESCRIPTION

DESCRIPTION

The Baja Designs S1 series lens kit allows you to replace your old or damaged lenses easily without voiding your light's warranty. These lens kits are designed to fit the S1 auxiliary lights. Options available for clear, baja amber, or factory amber lens, with clear lenses ideal for most situations and our selection amber lenses ideal for inclement or less than ideal conditions cutting through dust, fog, rain or snow with a less intense light creating contrast in your light spread keeping reflections to a minimum. With three lens colours and four different, distinct lens patterns to choose from, customising your light pattern to your needs is easier than ever.

Lens Pattern:

Spot: A longer and narrower 9-degree focus beam for illumination further down the trail or road. The Spot pattern is designed to be used in conjunction with additional Wide Cornering and/or Driving Combo beam lights.

Wide Cornering: The wide cornering pattern offers a 42-degree flattened horizontal beam, reducing blind spots and enhancing peripheral visibility in lighting zones 1 and 2. This cornering pattern is perfect for inclement weather such as dust, snow, rain or fog conditions while also perfect for seeing obstacles on the

trail, trail conditions, and potential hazards - making it easier to navigate through tight turns, winding trails, or through wooded areas.

Work/Scene: Emits a wide and even beam pattern designed to illuminate a large area with consistent and evenly distributed light. Ideal for tasks that require good visibility across a work area or scene, such as construction sites, camp setups, pit areas or any outdoor workspaces.

Lens Color:

Clear: The original performance lens. Our clear lens combined with our 5000k LEDs provide light most similair to daylight, reducing driver fatigue and increase terrain recognition.

Baja Amber: This performance-driven lens is specifically designed for off-road driving in challenging conditions such as dust, rain, snow, or fog. The Baja Amber lens minimises glare, enhancing visibility and significantly improving your driving experience.

Factory Amber: This replacement lens option is crafted to seamlessly match the OEM running lights found on vehicles today. Factory Amber provides a colour temperature best utilised in low-visibility conditions to increase depth perception while minimising glare.

With our uService® technology, enthusiasts can easily service their lights on the trail or at home without damaging or voiding the warranty of the lights. Each kit comes with one 10-inch lens and O-ring seal. This seal provides the waterproof and dustproof seal that makes all Baja Designs lights IP69K rated. Whether you busted your old lenses, or you just want to swap out for a different pattern, we have you covered.

S1 Series Lens Kit Features:

- Kit consists of one lens and one O-ring
- Available in clear, baja amber, or factory amber lens colours
- Four lens patters to choose from: Spot, Wide Cornering, Work/Scene, Trail

NOTE: Lens Kit comes with a single lens and a single O-ring
