SKU: N/A
Categories: Accessories, Accessories, S2 Pro, S2 Sport
Tag: Lens

PRODUCT DESCRIPTION

DESCRIPTION

Lens Pattern:

Spot: A longer and narrower 9-degree focus beam for illumination further down the trail or road. The Spot pattern is designed to be used in conjunction with additional Wide Cornering and/or Driving Combo beam lights.

Wide Cornering: The wide cornering pattern offers a 42-degree flattened horizontal beam, reducing blind spots and enhancing peripheral visibility in lighting zones 1 and 2. This cornering pattern is perfect for inclement weather such as dust, snow, rain or fog conditions while also perfect for seeing obstacles on the trail, trail conditions, and potential hazards — making it easier to navigate through tight turns, winding trails, or through wooded areas.

Work/Scene: Emits a wide and even beam pattern designed to illuminate a large area with consistent and evenly distributed light. Ideal for tasks that require good visibility across a work area or scene, such as construction sites, camp setups, pit areas or any outdoor workspaces.

Lens Colour:

Clear: The original performance lens. Our clear lens combined with our 5000K LEDs provides light most similar to daylight, reducing driver fatigue and increasing terrain recognition.

Baja Amber: This performance-driven lens is specifically designed for off-road driving in challenging conditions such as dust, rain, snow, or fog. The Baja Amber lens minimises glare, enhancing visibility and significantly improving your driving experience.

Factory Amber: This replacement lens option is crafted to seamlessly match the OEM running lights found on vehicles today. Factory Amber provides a colour temperature best utilised in low-visibility conditions to increase depth perception while minimising glare.

With uService from Baja Designs, replacing your old or damaged lens is a breeze on our S2 lights. Whether you busted your old one, or you just want to swap out for a different pattern, we have you covered. Follow the simple directions below to properly replace your lens and o-ring.

NOTE: Red, Blue, or Green coloured lens should only be used on the S2 Sport light.
