SKU: N/A
Categories: LED Auxiliary Lights, XL Pro Linkables

PRODUCT DESCRIPTION

Experience full adjustment and total performance with the Baja Designs XL Pro Linkable LED light bar kit, engineered for enthusiasts seeking to take charge with a lighting package that is completely customizable.

Built around our popular XL shallow moto housing, each light offers 4,095 raw lumens each from our next generation LEDs and can be configured with 3 up to 9 forward projecting lights that provide a smooth blend due to the use of multiple lens pattens illuminating zones 1, 2, 3 and 4 simultaneously.

The unique feature of our XL Linkable system provides 45 degrees of vertical pitch adjustment within each light or the entire unit. Completely independent horizontal adjustment per light allows for straight or arc configurations to perfectly match the lines of your vehicle's bumper or roofline.

The wiring comes fully crimped and trimmed, allowing for easy installation and the ability to add links down the road, and black rock guards are included to protect the lights when not in use. If you're looking to have a lighting system that performs as well as it looks, this is the auxiliary light kit for you!

Features:

• Uses XL Pro lights producing 4,095 lumens each
• 45 degrees of vertical pitch adjustment within each light or the entire unit.
• Independent horizontal adjustment per light allows for straight or arc configurations.
• Pre-Load kit included.
• Black rock guards included.
• Harness included (640115).

Note:Â XL Linkable mounting brackets not included.
