

LED, IR Follow Me Light

Specifications:

Voltage: 12V DC Only
Current : 40 mA
Weight : 20 grams

Led : 940 nm

Length : 53mm
Height : 12 mm
Width : 16 mm

Case : Machined Aluminium
Black Powder Coated
Epoxy Filled

Mounting: 2 by 6/32 SAE Threads
Tapped into case
Centres : Tapped Hole centres
37 mm

Cable : 320mm Typical Length

Description:

The 940nm Infrared Follow Me light has been designed to have a small physical footprint while producing a serious amount of 940nm IR illumination. With the small housing design, this light can be covertly mounted virtually anywhere on a vehicle and not be easily identified.

The IR LED emits a wavelength of light at 940 nanometers, requiring the use of night vision goggles to be viewed. The LEDs do not emit any signature visible to the naked eye. This light draws very little and can run on a 12v DC system. The housing is threaded for a standard 6-32 hardware.
